# VAN VLIET LAKE ASSOCIATION

2004: A message from Steve McComas President of Blue Water Science:

I've worked with lake associations for over 25 years. The Van Vliet group is in the top 5% of all the lake groups I have worked with. This ranking is based on the organized approach to include volunteers, the number of members who are making significant contributions, and the real passion of the lake residents to work to understand how the lake works and then to make sound ecological decisions to protect and improve the lake.

Keep up the good work.
